Completed 7-month 4 module, web developer course covering: Fundamental design and web technologies, development with JavaScript, React, Redux, HTML and CSS, Professional client-side development, building desktop and mobile applications with the latest technologies.

PASSIONS • HOBBIES

Love the outdoors and golf, love hanging with the fam, love learning about myself and new technologies. Recently discovered an appetite for coaching and teaching. When asked to fill in as coach for my 6 year old's soccer team I realized that I have a knack for it *and* its fun. Also, I have been more involved with the mentorship program at Turing. Remembering what its like to be a student there, I understand what they are going through. Being able to help them reach their goal(s) means a lot and its a great feeling when were able to solve a problem. As a bonus its excellent reinforcement to my skills and knowledge so we get to grow and get better together.
